INFORMATION SCIENCES

Volume 12
1977

An International Journal

Contents:

L. C. CHANG and D. K. PRADHAN (Poughkeepsie, NY)
A Graph-Structural Approach for the Generalization of Data Management Systems 1

DAVID PAGER (Honolulu, HI)
The Lane-Tracing Algorithm for Constructing $LR(k)$ Parsers and Ways of Enhancing Its Efficiency 19

CLARENCE A. ELLIS (Cambridge, MA)
Probabilistic Models of Computer Deadlock 43

B. R. UPADHYAYA and H. W. SORENSON (La Jolla, CA)
Bayesian Discriminant Approach to Input Signal Selection in Parameter Estimation Problems 61

J. L. BROWN, JR. (University Park, PA)
Crosscorrelation Between Linearly and Nonlinearly Distorted Versions of a Given Signal 93

VRUDHULA K. MURTHY, JOHN M. RICHARDSON, and L. JULIAN HAYWOOD (Los Angeles, CA)
Effect of Simultaneous Random Amplitude and Frequency Modulation on ECG Power Spectra 105

SHARON M. RICKMAN and ABRAHAM KANDEL (Socorro, NM)
Column Table Approach for the Minimization of Fuzzy Functions 111

©Elsevier North-Holland, Inc., 1977. All rights reserved.

K. L. TEO (Kensington, Australia) and
N. U. AHMED (Ottawa, Canada)
$L^p(R_0)(p \geq 1)$ Stability in the Mean $m(m \geq 1)$
of a Class of Stochastic Volterra
Integral Equations 129

DERICK WOOD (Hamilton, Ontario, Canada)
Generalized Time-Delayed OL Languages 151

NORIO BABA (Tokushima City, Japan)
Least Cost Testing Sequence Problem
with Unknown Rejecting Probabilities 157

JONG C. WANG, MARLIN H. MICKLE
and RONALD G. HOELZEMEN (Pittsburgh, PA)
Simplification of Boolean-Valued
Data by Minimum Covering 163

BERNARD P. ZIEGLER (Rehovot, Israel, and Ann Arbor, MI)
Canonical Realization of General Time Systems 179

G. ROZENBERG (Wilrijk, Belgium) and A. SALOMAA (Turku, Finland)
New Squeezing Mechanisms for L Systems 187

K. P. LEE (Staten Island, NY) and G. ROZENBERG (Wilrijk, Belgium)
TIL Systems and Languages 203

FRANCESCO ROMANI (Pisa, Italy)
On the Fast Synchronization
of Tree Connected Networks 229

R. B. ASHER (Lubbock, TX) and D. G. LAINIOTIS (Amherst, NY)
Adaptive Estimation of
Doubly Stochastic Poisson Processes. 245

C. H. SCOTT and T. R. JEFFERSON (New South Wales, Australia)
A Generalisation of Geometric Programming
with an Application to Information Theory 263

Author and Subject Indexes to Volume 12. 271

Author Index to Volume 12

Ahmed, N. U.
(See Teo, K. L.), 129

Asher, R. B., and Lainiotis, D. G.
(Adaptive Estimation of Doubly Stochastic Poisson Processes), 245

Baba, Norio
(Least Cost Testing Sequence Problem with Unknown Rejecting Probabilities), 157

Brown, J. L., Jr.
Crosscorrelation between Linearly and Nonlinearly Distorted Versions of a Given Signal), 93

Chang, L. C., and Pradhan, D. K.
(A Graph-Structural Approach for the Generalization of a Data Management Systems), 1

Ellis, C. A.
(Probabilistic Models of Computer Deadlock), 43

Haywood, L. J.
(Effect of Simultaneous Random Amplitude and Frequency Modulation on ECG Power Spectra), 105

Hoelzeman, R. G.
(see Wang, J. C.), 163

Jefferson, T. R.
(see Scott, C. H.), 263

An International Journal

EDITOR: John M. Richardson

Volume 13, 1977

ELSEVIER
NEW YORK

INFORMATION SCIENCES

Volume 13
1977

An International Journal

Contents:

ANN MARIE WALSH and WALTER A. BURKHARD (La Jolla, CA)
Efficient Algorithms for (3, 1) Graphs 1

GIOVANNI GUIDA, DINO MANDRIOLI, and MARCO SOMALVICO (Milan, Italy)
An Integrated Model of Problem Solver 11

N. C. MOHANTY (Downey, CA)
Binary and Ternary Signals with Small Cross Correlations 35

CHRISTOS A. PAPACHRISTOU (Philadelphia, PA)
Characteristic Measures of Switching Functions 51

T. J. TEOREY (Ann Arbor, MI) and K. SUNDAR DAS (San Antonio, TX)
Application of an Analytical Model
to Evaluate Storage Structures 77

ABRAHAM KANDAL (Socorro, NM)
A Note on the Simplification of Fuzzy Switching Functions 91

K. INOUE and A. NAKAMURA (Hiroshima, Japan)
Some Properties of Two-Dimensional On-Line Tessellation Acceptors . . 95

J. V. HANSEN and L. E. HEITGER (Bloomington, IN)
Models for Evaluating Information Updating Intervals 123

PER HEDELIN (Gothenberg, Sweden)
Optimal Smoothing in Discrete-Continuous
Linear and Nonlinear Systems 137

N. BABA, T. SHOMAN (Tokushima, Japan)
and Y. SAWARAGI (Kyoto, Japan)
A Modified Convergence Theorem
for a Random Optimization Method 159

W. J. LEIGHTON III and H. H. TAN (Princeton, NJ)
Capacity Region of Degraded
Broadcast Channels with Feedback 167

D. L. ALSPACH (La Jolla, CA)
A Stochastic Regulator using a Certainty
Equivalence Control with a Nonlinear Filter
for Processing Hard Limited Data 179

SIMON HAYKIN (Hamilton, Ontario, Canada)
Performance Analysis of a Radar Signal Processing System
with Continuous Electronic Array Scanning 201

INDER JEET TANEJA (Delhi, India)
On a Characterization of Unified Measure
in Information Theory 229

N. C. MOHANTY (Downey, CA)
Transition Density of Phase Error
in a Nonlinear Tracking System 239

JOHN T. RICKARD (La Jolla, CA)
The Zero-Crossing Interval Statistics
on the Smoothed Random Telegraph Signal 253

IZIDOR GERTNER and DAVID RAPPAPORT (Haifa, Israel)
Stochastic Control of System
with Unobserved Jump Parameter Process 269

SAWASD TANTARATANA and JOHN B. THOMAS (Princeton, NJ)
Truncated Sequential Probability Ratio Test 283

Author Index to Volume 13

Alspach, DL
A Stochastic Regulator Using a Certainty Equivalence Control with a Nonlinear Filter for Processing Hard Limited Data, 183

Baba, N; Shoman, T; and Sawaragi, Y
A Modified Convergence Theorem for a Random Optimization Method, 163
Burkhard, WA
See Walsh, AM, 1

Das, KS
See Teorey, TJ, 77

Gertner, I. and Rappaport, D
Stochastic Control of System with Unobserved Jump Parameter Process, 269
Guida, G; Mandrioli, D; and Somalvico, M
An Integrated Model of Problem Solver, 11

Hansen, JV and Heitger, LE
Models for Evaluating Information Updating Intervals, 127
Haykin, S
Performance Analysis of a Continuously Electronic Scanning Array Signal Processing System for Radar Applications, 201
Hedelin, P
Optimal Smoothing in Discrete-Continuous Linear and Nonlinear Systems, 141
Heitger, LE
See Hansen, JV, 127

Inoue, K and Nakamura, A
Some Properties of Two-Dimensional On-Line Tessellation Acceptors, 99

Kandel, A
A Note on the Simplification of Fuzzy Switching Functions, 95

Leighton, WJ and Tan, HH
Capacity Region of Degraded Broadcast Channels with Feedback, 171

Mandrioli, D
See Guida, G, 11
Mohanty, NC
Binary and Ternary Signals with Small Cross Correlations, 35
Mohanty, NC
Transition Density of Phase Error in Nonlinear Tracking System, 239

Nakamura, A
See Inoue, K, 99

Papachristou, CA
Characteristic Measures of Switching Functions, 51

Rappaport, D
See Gertner, I, 269
Rickard, JT
The Zero Crossing Interval Statistics of the Smoothed Random Telegraph Signal, 253

Sawaragi, Y
See Baba, N, 163
Shoman, T
See Baba, N, 163
Somalvico, M
See Guida, G, 11

Tan, HH
See Leighton, WJ, 171
Taneja, IJ
On a Characterization of Unified Measure in Information Theory, 229
Tantaratana, S and Thomas, JB
Truncated Sequential Probability Ratio Test, 283
Teory, TJ and Das, KS
Application of an Analytical Model to Evaluate Storage Structures, 77
Thomas, JB
See Tantaratana, S, 283

Walsh, AM, and Burkhard, WA
Efficient Algorithms for (3, 1) Graphs, 1
